Main menu
Setup :
Start server setup wizard
a1
Utility :
Individually activate tools for server setup and maintenance
Document :
Display document files
End
Main menu
Setup support system is a tool for simplifying complexity for server hardware setting to OS installation.
Setup :
You can construct RAID in hard disks and install OS in series of processes. Simple setting with simplified and automated operations is available.
Utility :
Utility includes auxiliary function for manual installation and setup information setting function which allows administrators to define setup contents in advance.
Document :
You can open folders containing document files.

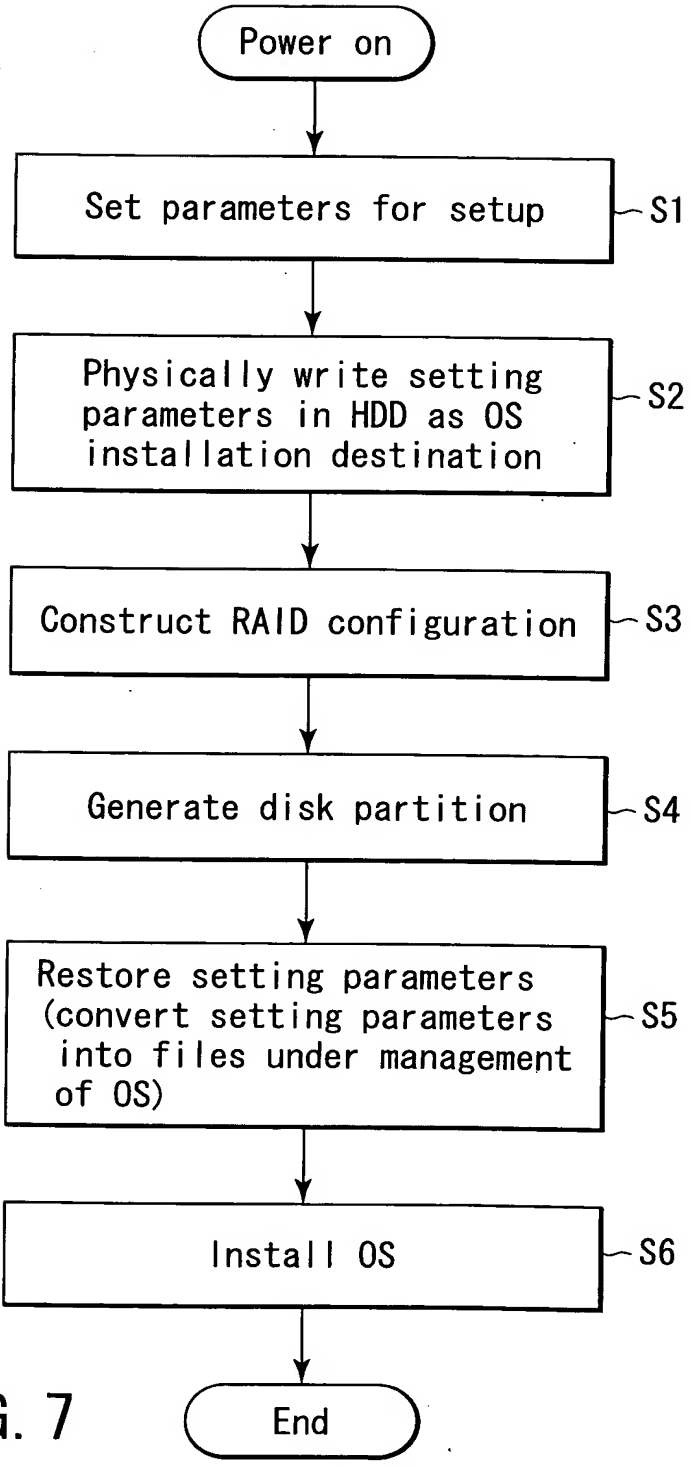
FIG. 6



Power on
Set parameters for setup
S1
Physically write setting parameters in HDD as OS installation destination
S2
Construct RAID configuration
S3
Generate disk partition
S4
Restore setting parameters (convert setting parameters into files under management of OS)
S5
Install OS
S6
End
